

NEPIC Cluster Connect Meeting

NEPIC is a membership organisation working to grow the chemical-using industries, businesses and associated supply chain in the North East of England.

As part of this support, NEPIC holds monthly meetings called CLUSTER CONNECT to bring together member companies to facilitate introductions and share business information and opportunities.

These meetings are designed to give member companies the opportunity to give a 5 minute presentation and continue to be very popular with members.

The March 2016 meeting was hosted by the Materials Processing Institute using the Fitzgerald Main conferencing facility. 37 members attended and the Fitzgerald Conference Suite proved to be the perfect location with all audio visual and catering provided by the event management team at the Institute.

Felix O'Hare, Director of Projects at NEPIC said, "I was very impressed with the quality of the facilities, the

location was perfect with ample on-site parking, the room layout worked well and the event ran very smoothly which is credit to the great support from the MPI team".

MATERIALS PROCESSING INSTITUTE IS THE PERFECT PLACE TO HOST AN EVENT

The Materials Processing Institute offers a range of modern, well equipped venues suitable for meetings, conferences, exhibitions, workshops, training, networking, dinners, presentations and other events. All rooms offer flexible layout options.
